FIG. 2

Figure 1 consists of 12 bar charts, labeled (a) through (l), each representing a different protein type. The y-axis for all charts is 'Percentage of total protein' ranging from 0 to 100. The x-axis for all charts is 'Protein type' with categories A, B, C, D, E, F, G, H, I, J, K, and L. Each chart displays six bars corresponding to different treatment groups: Control (white), 100 mg/kg (light gray), 200 mg/kg (medium gray), 400 mg/kg (dark gray), 800 mg/kg (black), and 1600 mg/kg (white with black outline). The data shows varying distributions of protein types across the fractions for each treatment group.
